

LUNARIS™ Multiplex Assays

Deciphering COVID-19

LUNARIS™ is a proprietary platform for multiplex immunoassays that allows monitoring the immune response, in particular the cytokine storm, in severe cases of COVID-19.

- > For sample volumes down to **3 µL**
- > Identify cytokine profiles associated with **COVID-19**
- > Use the power of one platform **from lab to clinic**

LUNARIS™ Kits

- > Detect and quantify multiple **biomarkers relevant for COVID-19** research
- > Translate knowledge from mouse to man
- > Custom assays available upon request

LUNARIS™ Reader

- > Load-and-read, fully integrated system
- > Two models to match your throughput
- > 96 samples read in less than 10 minutes

LUNARIS™ Software

- > Complete data evaluation in less than a minute
- > Intelligent QC function for clear results reliability
- > All results and graphs exportable in customized reports or data spreadsheets
